Experience in Asia

IEEE Power & Energy Society, the host of the IEEE PES Generation, Transmission and Distribution Grand International Conference & Exposition Asia (GTD Asia 2019), The 1st GTD Asia 2019 will be held during **19-23 March 2019** at **Bangkok International Trade & Exhibition Centre (BITEC), Bangkok, Thailand.**

Under
the theme

**BIG
SHIFT
IN POWER
& ENERGY**

The GTD Asia 2019

has been inherited from IEEE PES T&D Conference and Exhibition arranged
biannual **in North America for almost 40 years**

which is expected to be the most prominent event of the IEEE PES held in Asia. IEEE is a non-profit organization with a great purpose of exchanging ideas and experiences through discussions and paper presentations where over 10,000 of electricity supply industry all around the world including top executives, government officials and professionals from research institutions will gather to strengthen the world's power supply industry connection as well as initiative new global challenges for sustainable energy.

In this world class event

There will be three major tracks which are (i) Power Generation, (ii) Transmission and Distribution and (iii) Renewable Energy.

IEEE PES PG Asia is IEEE conference and exposition on Power Generation. The event establish first time in Bangkok, Thailand, will provide comprehensive coverage of the strategic planning, optimizing operation, emerging technology trends and issues facing Power Generation and other related fields.

IEEE PES T&D Asia the world's largest technical and professional forum for the advancement of technology, has over its 40 years history, established itself as a leading platform where the power industry comes together to share information on the challenges facing and discussing opportunities and solutions for advancing Transmission and Distribution sectors.

IEEE PES RE Asia is IEEE conference and exposition on Renewable Energy. Renewable Generation threatens to disrupt the traditional power generation. This leading conference and exposition for the Asian renewable and alternative energy industry will become a major forum for the industry where topics and issues of the day are discussed.
